About Me

I'm a second-year Software Engineering student at IstinYE University and a passionate full-stack developer. Starting with front-end development, I mastered creating engaging, user-focused interfaces before expanding into back-end development to build robust and scalable applications. With over two years of dedicated study and hands-on experience, I enjoy bringing ideas to life from front to back and excel at communicating and collaborating effectively to drive projects forward.

Experience

E+plus, Egypt, Remote
August 2024 – October 2024

Front-end Developer - Internship

- Utilized PugJS, Sass, GulpJS, Bootstrap, and Tailwind for efficient styling and layout.
